REVIEW OF OPERATIONS AND LIKELY DEVELOPMENTS

The Company has maintained exploration activity on its main project areas in the Musgrave and Ravensthorpe regions. A summary of this activity follows:

The Musgrave Project – Traka managed

Geochemical, geological and geophysical programs have been completed on a number of tenements in the Jameson area of the Musgrave Project. This work has highlighted a number of copper, nickel, platinum and vanadium anomalies. Some of these anomalies are now scheduled for follow up diamond and RC drilling programs in May 2011. Other anomalies will be subject to further geological investigation ahead of any further decisions to drill.

Exploration programs will recommence in March 2011 on 5 exploration licences in the Jameson area of the Musgrave Project. Planning is also underway to negotiate access to new exploration licences. On the assumption of success exploration activity will be expanded later in the year to include these new areas.

The Musgrave Project – Anglo American (Australia) Pty Ltd ("AAE") managed

AAE has also maintained an active exploration program on their joint venture tenements within the Musgrave Project. A drilling program plus geophysical, geochemical and geological surveys have been undertaken and follow up work on a number of these targets have been scheduled for recommencement in April 2011. A new drilling program is also planned to recommence in June 2011.

Under the terms of the joint venture, AAE have the right to earn 51% in the joint venture tenements upon expenditure of \$3 million. Subsequent to reaching this equity position AAE can elect to earn up to 75% by the additional expenditure of \$6 million.

The Ravensthorpe Project

The Company's interests in the Ravensthorpe region are extensive and consist of a mixture of joint ventures, with the partners managing and funding exploration programs, in some areas and other areas which continue to be explored by Traka in its own right.

Traka currently has two joint ventures with Tectonic Resources NL, and one with Galaxy Resources Ltd. In all cases Traka is currently free carried.

DIRECTORS' REPORT FOR THE HALF-YEAR ENDED 31 DECEMBER 2010

Traka's sole interest tenements in the Ravensthorpe Project are located in the Jerdacuttup area for its nickel sulphide potential and in the Mt Short area for its nickel as well as copper, lead and zinc potential. A drilling program is currently underway in the Jerdacuttup area and a geophysical survey has just been completed in the Mt Short area. A number of newly discovered targets in the Mt Short area are currently being evaluated and may be scheduled for drilling.

NOTE 1. BASIS OF PREPARATION OF THE HALF YEAR FINANCIAL STATEMENTS

The half-year financial statements do not include all notes of the type normally included within the annual financial statements and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and financing and investing activities of the Company as the full financial statements.

The half-year financial statements should be read in conjunction with the annual financial statements of Traka Resources Limited as at 30 June 2010.

It is also recommended that the half-year financial statements be considered together with any public announcements made by Traka Resources Limited during the half-year ended 31 December 2010 in accordance with the continuous disclosure obligations arising under the *Corporations Act 2001*.

(a) Basis of Accounting

The half-year financial statements are general-purpose financial statements, which have been prepared in accordance with the requirements of the *Corporations Act 2001*, applicable Accounting Standards including AASB 134 "*Interim Financial Reporting*" and other mandatory professional reporting requirements.

The half-year financial statements have been prepared on the accruals basis and are based on historical cost modified for financial assets and liabilities for which the fair value basis of accounting has been applied.

For the purpose of preparing the half-year financial statements, the half-year has been treated as a discrete reporting period.

Traka Resources Limited is a listed public company, incorporated and domiciled in Australia.

(b) Significant Accounting Policies

The accounting policies and methods of computation adopted in the preparation of the half-year financial statements are consistent with those adopted and disclosed in the Company's annual Financial Statements for the year ended 30 June 2010 and corresponding interim reporting period.

The directors evaluate estimates and judgements incorporated into the financial report based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Company.
