

CURRENT CAREER OPPORTUNITIES

CIVIL PROJECT ENGINEER

ROCKHAMPTON LOCATION

Due to our recent business growth JRT Civil is seeking a Civil Engineer to become part of our Project Management and Estimating teams.

The ideal person will be hard working, motivated, practical and willing to make an above average contribution to our local family-owned business.

They will be computer literate, willing to learn, willing to undertake a broad range of duties, able to work in a team environment and to work cooperatively and professionally with clients, management, subcontractors, and our employees.

You will need to bring a high-level worth ethic and take ongoing pride in your performance and presentation. They will also need to bring skills, ideas and innovation to JRT Civil.

We will provide a busy environment where you will look forward to coming to work. We will provide broad and diverse development across all levels of our business and expect this to be a long-term position.

We are looking for the right person and encourage applications from candidates who understand the above requirements.

Ideal candidate will possess:

- Bachelor of Engineering or equivalent;
- Minimum 3 years' experience on Civil Construction Projects including, bulk earthworks, concrete works, underground services, road and especially sub divisions;

If you are interested in this opportunity please apply by forwarding your resume to jobs@jrtgroup.com

- Ability to work to a high level of accuracy on projects;
- Sound technical engineering knowledge and understanding;
- Highly committed to maintaining and implement quality in each project and ensuring that it is a part of the organization's culture.
- High level of communication, written and interpersonal skills;
- Excellent computer literacy skills;
- Good problem-solving abilities;
- Excellent attention to detail;
- High level planning, assigning resources and scheduling projects.

Key Responsibilities:

- Oversee all project plans of civil construction works
- Plan and coordinate project engineering assignments entailing technical specifications and the preparation of detailed plans;
- Assist in completing Inspection and testing plans;
- Assist in preparing and presentation of progress claims to the client, as well as tracking project costs and budget;
- Maintaining the monitoring and good implementation of project progress, costs, safety and QA / QC procedures;
- Interface between office and site-based staff;
- Train and manage junior engineers;
- Compose weekly/monthly progress reports;
- Oversee document control registers and ensure that current copies of the quality system are kept up to date;
- Organize with other team members the allocation of plant and equipment.
- Evaluate and identify challenges and utilize resources to solve problems
- Follow and report to the Divisional manager on progress for each project.
- Assist Divisional Manager in any assigned task as required.
