Vital Chemical

With the ability to provide instant stabilisation in combination with improved seed germination, Vital Strike leads the way in vegetation establishment technology.

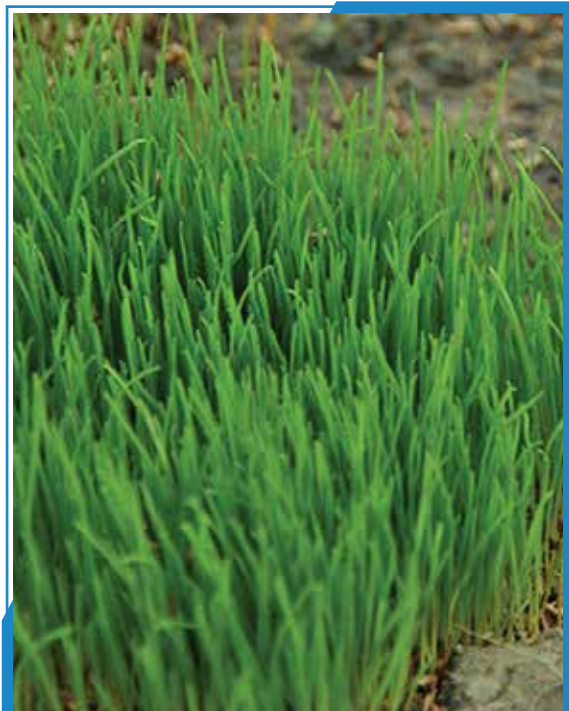

Developed for immediate erosion control and growth, Vital Strike provides an environment for sustainable long term ground cover and revegetation and is proven to offer immediate soil stabilisation and vegetation establishment to the exposed area.

Vital Strike provides solutions for environmental and revegetation compliance requirements and employs proven and available nutrients for immediate results which complement the soil stabilisation process.

Vital Strike's formulation aims to deliver effective soil stabilisation with efficient nutrient supply. It's unique chelating delivery system incorporates trace elements for optimum uptake and nutrition, with maximum results.

- EPA Certified as non-hazardous
- Quick and easy to apply to any seeded area or in combination with seed as a hydroseed alternative
- Reduces dust and erosion
- Incorporated fertiliser for improved revegetation
- Increases moisture retention and reduced weed
- Improved establishment
- Cures in hours and will not remobilise
- Significant water and time savings

COST-EFFECTIVE, INSTANT & SUSTAINABLE SURFACE STABILISATION TECHNOLOGY

Vital Chemical's industry partner H2flow Hire provides turn-key applications of Vital Bon-Matt products.

Vital Chemical provides products which enable our clients to adapt best practice technologies to mitigate the environmental impact of mining and civil developments. Vital Chemical's products are designed for ease of use without the need for specialised equipment.
